Express yourself, express upgrade.

We are all aware of the fact that the speakers' quality is crucial for the quality of an audio system.

If your home system doesn't satisfy you, it is enough to replace your speakers with our new Express to perceive immediately an enormous improvement with a higher sound level and more definition.

Express has been worked to the smallest detail in order to access to the "French Sound" without any other modification.

"French Sound" is a subtle and very specific balance designed to accurately reproduce the music's midrange details whilst preserving all the emotions of the voice. It faithfully reproduces the original dynamics of the original recording but diligently retains all the nuances and vocal clarity that makes the music come alive.

Express is the compromise for those whose priorities are both the quality and the price.
